TRANSMITTAL LETTER

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

Sir:

Submitted herewith for filing in the U.S. Patent and Trademark Office is the following:

- 1. Submission of Documents to Supplement Filing Documents under 35 USC 371;
- 2. PCT/IB/373 (International Preliminary Report on Patentability); and
- 3. PCT/ISA/237 (Written Opinion of the International Searching Authority).

The Commissioner is hereby authorized to charge any deficiency or credit any excess to Deposit Account Number 14-0112.

Respectfully submitted,

THE NATH LAW GROUP

SUBMISSION OF DOCUMENTS TO SUPPLEMENT FILING DOCUMENTS UNDER 35 USC 371

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

In order to supplement the filing documents for the national phase filing Under USC 371 commenced on <u>July 28, 2006</u>, applicant now submits the following documents:

- 1. PCT/IB/373 (International Preliminary Report on Patentability); and
- 2. PCT/ISA/237 (Written Opinion of the International Searching Authority).

Please charge any deficiency or credit any overpayment to our Deposit Account Number 14-0112.

Respectfully submitted,

THE NATH LAW GROUP

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2005/050415

Box No. I Basis of the opinion	
 With regard to the language, this opinion has been established on the basis of the international the language in which it was filed, unless otherwise indicated under this item. 	al application in
This opinion has been established on the basis of a translation from the original language language , which is the language of a translation furnished for the purposes of internation (under Rules 12.3 and 23.1(b)).	into the following onal search
With regard to any nucleotide and/or amino acid sequence disclosed in the international apprecessary to the claimed invention, this opinion has been established on the basis of:	olication and
a. type of material:	
a sequence listing	
☐ table(s) related to the sequence listing	
b. format of material:	
☐ in written format	
☐ in computer readable form	
c. time of filing/furnishing:	
☐ contained in the international application as filed.	
☐ filed together with the international application in computer readable form.	• •
☐ furnished subsequently to this Authority for the purposes of search.	
3. In addition, in the case that more than one version or copy of a sequence listing and/or table has been filed or furnished, the required statements that the information in the subsequent copies is identical to that in the application as filed or does not go beyond the application as appropriate, were furnished.	or oddillossi
4. Additional comments:	
Box No. II Priority	
The validity of the priority claim has not been considered because the International Searchir does not have in its possession a copy of the earlier application whose priority has been cla required, a translation of that earlier application. This opinion has nevertheless been establis assumption that the relevant date (Rules 43bis.1 and 64.1) is the claimed priority date.	imad or where
2. This opinion has been established as if no priority had been claimed due to the fact that the has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the if filing date indicated above is considered to be the relevant date.	priority claim nternational
3. Additional observations, if necessary:	
see separate sheet

Box No. VI Certain documents cited

 Certain published documents (Rules 43bis.1 and 70.10) and /or

.......

2. Non-written disclosures (Rules 43bis.1 and 70.9)

see form 210

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Re Item I

Basis of the opinion

The application is directed to

- (i) 2-(piperidin-4-yl)-pyridazin-3-ones (1) (claims 1-13),
- (ii) the medical use of compounds (1) (claim 14),
- (iii) a pharmaceutical composition comprising a compound (1) (claim 15),
- (iv) the second medical use of compounds (1) (claim 16), and
- (v) the corresponding therapeutic methods (claims 17-18).

Re Item II

Priority

The claimed date of priority does not appear valid for compounds (I) wherein R^{22} and R^{23} together form ring systems selected from morpholin-3,5-dione-4-yl to isoindol-1,3-dione-2-yl according to claim 1, the claims 2-13, and subject matter referring to these compounds respectively claims.

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 17 and 18 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1 Reference is made to the following documents.

D1: EP-A-0 738 715, 23.10.1996; cited in the application. D2: WO 02/064584 A, 22.08.2002; cited in the application.

D3: WO 02/085906 A, 3110.2002; cited in the application.

D4: WO 2004/018449 A, 04.03.2004.

D4 was published after the priority date. Under the presumption that the priority is valid for the claimed matter the said document is not considered as prior art under Rule 64.1 PCT.

- 2 Novelty
- 2.1 D1 relates to pyridazinone derivatives as PDE4 inhibitors. The present compounds (1) differ from the compounds of D1 through the 1-R⁹-piperidin-4-yl group and in having the R¹/R² alkyl groups in position 4 rather than in position 5. The present claimed matter is thus novel vis-à-vis D1.

D2 and **D3** relate to phthalazinone derivatives as PDE4 inhibitors. The present compounds (1) differ from the compounds of **D2/D3** insofar as they represent monocyclic pyridazinones rather than bicyclic phthalazinones. The present claimed matter is thus novel vis-à-vis **D2/D3**.

- 2.2 The P-document **D4** relates also to phthalazinones as PDE4 inhibitors, whereas the application is directed to pyridazones. **D4** will, thus, not become relevant to the question of novelty of the application.
- 4 Inventive Step
- 4.1 The application describes the preparation of certain compounds (1) and shows that such compounds exhibit PDE4 inhibitory activity (the application, page 34).
- 4.2 In view of **D1** as most relevant state of the art the problem underlying the application may be seen in the provision of further PDE4 inhibitors. The present compounds (1) differ from those of **D1** in bearing in the 2-position a 1-R⁹-piperid-in-4-yl substituent rather than a group -Q-R⁵ and in bearing the two R¹/R² alkyl substituents in position 4 instead of 5. Although the documents **D2** and **D3** teach already that the present R⁹-piperidin-4-yl substituents are compatible with the desired activity, it does not appear
